

ABOUT US

Since 1957, we have proudly offered a wide and reliable range of purification, extraction, and liquid handling solutions to help scientists in their daily work.

With our family of products, you'll find tailored solutions and cost-effective ways to manage your liquid samples. The pipetting system is our signature specialty, and we take great joy in sharing our knowledge with pipette users, helping them to achieve their goals. Gilson offers a diverse range of manual to automated liquid handling solutions, including single channel pipettes, multichannel pipettes, semi-automated and automated pipetting solutions, pipette tips, pipette accessories, and tailor-made services. With our products, you'll find smart solutions and cost-effective ways to manage your liquid samples, empowering you to successfully complete your research and have total confidence in your sample preparation steps.

SERVICES AND SUPPORT

EXPERTS READY TO HELP

WE'RE HERE TO HELP

We are committed to the highest caliber of quality and complete customer satisfaction with our suite of products and services. This commitment doesn't end with your purchase—it only just begins. We provide custom solutions to help you meet a wide range of laboratory requirements including: service, preventative maintenance, calibration, and general product support. Gilson has dedicated service, support, and training teams worldwide to help you maintain maximum performance of your instruments, make your lab life easier, and ensure reliability of your data.

MANUAL LIQUID HANDLING

HAVE OUR EXPERT TECHNICIANS RESTORE YOUR PIPETTES

Gilson is the expert on pipettes with decades of experience. Regular maintenance of your pipettes will ensure they operate within specification and deliver reproducible data with the accuracy you need. Regular maintenance will also minimize downtime in your lab, will reduce the likelihood of unplanned, costly repairs and increase the lifespan of your pipettes. Gilson service technicians are factory trained, use manufacturer parts, as well as proprietary Volumetrics GV® Software. Volumetrics GV utilizes automatic data transfer from our analytical balances and environmental probes to generate your service documentation with the utmost attention to detail and accuracy of data. Gilson is an ISO 9001-certified company and ISO 17025-accredited service is available throughout the organization.

AUTOMATED LIQUID HANDLING

AVOID UNEXPECTED SYSTEM DOWNTIME AND ASSURE ACCURACY

Keep your instruments running like new by signing up for preventative maintenance services. With regularly scheduled preventative maintenance, you'll extend the life of your instruments and save time and money by avoiding unexpected interruptions to your work. Plus, maintain confidence in the accuracy and reliability of your results from knowing your instrument is operating within original specifications.

LIQUID HANDLING

TRUSTED RESULTS BEGIN WITH TRUSTED LIQUID HANDLING TOOLS

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results, while making life in the lab easier. Beginning with the legendary PIPETMAN® technology, our liquid handling tools have evolved with your needs. Ergonomically designed with scientists like you in mind, we offer durable solutions from manual, single channel units to completely automated liquid handling systems.

pipetman[®]

PIPETTE SMARTER, REPORT FASTER, CONFIDENTLY,

PIPETMAN[®] M is an electronic pipette that offers accuracy and precision in both standard and repetitive pipetting modes. Requiring virtually no pipetting forces to aspirate and dispense samples, PIPETMAN M helps reduce pipetting fatigue and increase pipetting efficiency. PIPETMAN M is available in 20 models covering a volume range from 0.5 µL to 10 mL in single channel, and 0.5 μ L to 1200 μ L in multichannel.

EASE-OF-USE

Simple-to-use, motorized pipette-two-button operation. With a streamlined user interface, five pipetting modes, control of your sample prep is at your fingertips. Switch into custom mode to create a new protocol. Save and transfer your protocol securely into PIPETMAN[®] M Software for recall at a later date.

ON-TARGET PERFORMANCE

Trust in your results with guaranteed performance in both standard and repetitive pipetting mode.

PIPETMAN® M Connected

PIPETMAN M Connected is a Bluetooth®-enabled electronic pipette that offers complete access to your pipette information through the PipetteScope[™] app available on Google Play.

Know exactly when your pipette needs to be calibrated. In one location, access service history reports and gain visibility of the pipette usage analytics.

TRACKMAN® Connected

TRACKMAN Connected is a tablet designed to communicate with PIPETMAN M Connected via Bluetooth®. The tablet interacts in real-time with the pipette and guides you through your protocol. Through an app, you can easily request a calibration appointment and view service history reports in one central location.

PIPETMAN M Connected and TRACKMAN® Connected are available in Europe and the United States only.

pipetman®

INCREASE PRODUCTIVITY WITHOUT SACRIFICING COMFORT

PIPETMAN[®] L is the latest mechanical pipette from Gilson, built on ergonomics, comfort, and traceability research. This pipette combines the legendary robustness of the PIPETMAN[®] Classic, a newly designed body, and state of the art mechanism.

ALL DAY PIPETTING COMFORT

Balance is key to a comfortable pipette. PIPETMAN L has the ideal weight, handle shape and tip ejection to maximize just that.

SECURE PIPETTING

PIPETMAN L features a true volume-locking mechanism to guarantee no accidental volume change during pipetting cycles, which could alter accuracy and precision.

Every aspect of the PIPETMAN L has been designed with your hand in mind to help increase daily productivity and pipette longer without fatiguing your hand.

PIPETMAN L multichannel models offer optimized performance across channels for a uniform sample delivery.

PIPETMAN L is also available as a fixed volume pipette.

FULLY AUTOCLAVABLE*

PIPETMAN L variable volume models are fully autoclavable without disassembly for maximum convenience, as well as protection from cross-contamination.

*Only current variable volume models are fully autoclavable. Variable volume models have a serial number that starts from NK and a steam-sterilization mark on the pipette.

pipetman® G

PREMIUM PIPETTING COMFORT

PIPETMAN[®] G offers one of the lowest pipetting forces commercially available. With a redesigned piston assembly system and high quality piston grease, PIPETMAN G guarantees hours of comfortable pipetting.

RELIABLE RESULTS

PIPETMAN G relies on the legendary accuracy, precision, and reliability of PIPETMAN[®], with improved pipetting comfort.

BUILT-TO-LAST AND CONVENIENT

Made of PVDF and stainless steel, PIPETMAN G offers premium durability. The PIPETMAN G clip ejector allows for convenient access to serviceable parts.

THE WORLD PIPETTING STANDARD

PIPETMAN[®] Classic line, the world standard in pipetting, offers a wide range of continuously adjustable, air-displacement pipettes with legendary accuracy and precision. The PIPETMAN Classic line is available in eight single channel models covering a range of volumes from 0.2 μ L to 10 mL.

BUILT TO LAST

Made of highly resistant materials like PVDF and stainless steel, PIPETMAN Classic offers uncontested durability and reliability. Built to last, it is the economical solution for years of pipetting.

EASIEST PIPETTE TO MAINTAIN

Routine cleaning and maintenance are all that is required to keep PIPETMAN Classic in top condition for years.

The PIPETMAN Classic design allows for easy access to user-serviceable parts, along with a fully autoclavable tip holder and ejector.

AN EVOLUTION

1969 The Original PIPETMAN	1972 PIPETMAN* Classic	2007 PIPETMAN* Neo	2011 PIPETMAN* G	2012 PIPETMAN* L
and the second s		S. T		
The PIPETMAN story began more than 40 years ago with the invention of the original PIPETMAN, the world's first adjustable volume pipette.	PIPETMAN Classic is the world standard in pipetting. It boasts accuracy, precision, and reliability.	PIPETMAN Neo contains all the benefits that built the reputation of the legendary PIPETMAN Classic with the added bonus of increased comfort.	PIPETMAN G provides the robustness and dependable accuracy in results of the PIPETMAN Classic and offers lower pipetting forces.	PIPETMAN L is the latest mechanical pipette from Gllson, built on ergonomics, comfort, and traceability research.

For more information about PIPETMAN Neo, please contact your local Gilson representative.

MAXIMIZE REPRODUCIBILITY OF YOUR BIOLOGICAL SAMPLE PREP

Increase reproducibility and the pace of your experiments with this easy-to-use, affordable, automated liquid handling platform.

UPGRADE TO AUTOMATION FOR RELIABLE, ACCURATE PIPETTING

Protect your important samples from procedural errors and maximize accuracy and precision with fully automated pipetting protocols utilizing PIPETMAN[®] technology.

FREE YOURSELF FROM TEDIOUS SAMPLE PREP WORK

Let PIPETMAX[®] prepare samples for you! Enjoy more freedom away from the bench and focus on what's important—your next discovery.

STAY FLEXIBLE-FOR NOW AND FOR THE FUTURE

Use any reagent or kit, and adapt your pipetting protocols to meet the unique needs of your research.

PIPETMAN INSIDE

With PIPETMAN inside, you can trust your pipetting to be reliable and consistent-plate to plate, lot to lot, time after time.

PIPETMAX*				
Specification	Description			
Removable Tray Capacity	Two Options: 9-position removable tray (microplate footprints, but not for 384-well microplates) 9-position removable tray for 384-well microplates			
Control	Touchscreen tablet or PC control via USB and TRILUTION* micro software			
Pipette Head Options	Eight channel 1 μL-20 μL Eight channel 20 μL -200 μL Single channel 1000 μL			
Pipette Head Mounts	Two PIPETMAX pipetting heads			
Labware Compatibility	Standard shallow- and deep-well microplates and microcentrifuge tubes			
	PIPETMAX with rotating cover 54.4 x 65.5 x 53.1 cm (21.4 x 25.8 x 20.9 in)			
Dimensions (W x D x H)	PIPETMAX with rotating cover installed on optional riser assembly for off-bed tip disposal $54.4 \times 65.5 \times 69.6 \text{ cm} (21.4 \times 25.8 \times 27.4 \text{ in})$			
	PIPETMAX without cover 50.8 x 64.3 x 49.5 cm (20 x 25.3 x 19.5 in)			
Environmental Conditions	Indoor use Altitude: up to 2000 m Temperature range: 5°C-40°C Humidity: Maximum relative humidity 80% for temperatures up to 31°C, decreasing linearly to 50% relative humidity at 40°C

platemaster[®]

FAST MICROPLATE PIPETTING

PLATEMASTER[®] is an easy-to-use, accurate solution for high throughput pipetting of 96-and 384-well microplates.

SAVE TIME AND INCREASE YOUR PRODUCTIVITY

With minimal setup you can fill 96or 384-well plates in less than one minute by significantly reducing the number of pipetting steps.

SIMPLIFIES SAMPLE PREP

PLATEMASTER requires no programming, no power, and minimal training, so you can start pipetting right away.

CONVENIENT FOR ANY MICROPLATE APPLICATION

From plate transfer to supernatant, achieve accuracy and precision on the bench or under the hood.

PLATEMASTER ACCESSORIES

Description	Part Number
384-well adapter, positioned done by wheel.	F1077602

PIPETTE ACCESSORIES

CARROUSEL[™] PIPETTE STAND Protects pipettes from shocks and contamination. Holds up to seven Gilson pipettes for space saving.

ORDERING INFORMATION

CARROUSEL, stand for 7 pipettes (PN F161401)

COLORIS[™] IDENTIFICATION CLIPS

Identify or personalize your PIPETMAN. Write your name or application to avoid mix-ups and then snap into place.

ORDERING INFORMATION

10 Coloris Identification Clips, mixed colors (PN F161301) 10 Coloris Identification Clips, red (PN F161302) 10 Coloris Identification Clips, yellow (PN F161303) 10 Coloris Identification Clips, green (PN F161304) 10 Coloris Identification Clips, blue (PN F161305) 10 Coloris Identification Clips, white (PN F161306)

SINGLE[™] PIPETTE HOLDER

Holds your single or multichannel PIPETMAN*. Sticks to any smooth, dry surface. Prevents liquid from running inside shaft.

ORDERING INFORMATION
Single Pipette Holder (PN F161406)

TRIO™ PIPETTE STAND

Safely stores and protects three PIPETMAN

Helps organize your workbench.

ORDERING INFORMATION

Trio Pipette Stand for 3 pipettes (PN F161405)

POWER CARROUSEL™ PIPETMAN® M charging stand. Charge up to five at once in one hour. Keeps your PIPETMAN M always operational. ORDERING INFORMATION

COMFORT HANDLE

Clips on to PIPETMAN* Classic, PIPETMAN* Neo, and PIPETMAN* G models. Reduces the force needed to grip the pipette for maximum comfort.

COMFORT HANDLE pack of 3, blue (PN **F161486**) COMFORT HANDLE pack of 3, white (PN **F161488**) COMFORT HANDLE pack of 50, blue (PN **F161485**) COMFORT HANDLE pack of 50, white (PN **F161487**) COMFORT HANDLE stickers, 120 (PN **F161499**)

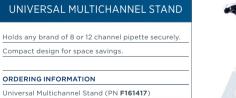

REAGENT RESERVOIRS

Disposable, ideal for dispensing reagent with multichannel pipettes. 25 mL and 50 mL available.

ORDERING INFORMATION

Reagent Reservoir 25 mL, 100 (PN **F267660**) Reagent Reservoir 50 mL, 100 (PN **F267670**)

JIMMY[™] MICROTUBE OPENER

Clips on to pipette. Increases pipetting efficiency. Lessens the fatigue associated with manual tube opening

ORDERING INFORMATION The JIMMY Microtube Opener (PN F144983)

4 GILSON

HIGHEST QUALITY TIPS FOR SUPERIOR RESULTS

Not all pipette tips are created equal. Trust Gilson tips to deliver the accuracy and precision your experiments demand. All tips are manufactured using the highest quality materials and state-of-the-art manufacturing techniques so you can be assured of consistent lot-tolot performance.

GUARANTEE YOUR PIPETMAN RESULTS

PIPETMAN DIAMOND Tips are designed to fit your PIPETMAN perfectly. Only by using PIPETMAN DIAMOND Tips in conjunction with your Gilson pipette can you guarantee the maximum accuracy and precision.

AFFORDABLE AND VERSATILE FOR EVERY APPLICATION

Your needs, budget, and tip consumption vary according to your specific research activity. With our extensive range of packaging, every lab can afford the highest quality PIPETMAN DIAMOND Tips for every application.

CONTAMINATION-FREE

Our tips are made of the highest grade material within a fully traceable, clean room environment, ensuring they offer low retention and are free of contaminates that can alter your experiments. From mold to bench, they are guaranteed, certified, and traceable to meet the most stringent demands in many applications.

Also available are PIPETMAN[®] DIAMOND Filter Tips offering total protection against aerosol contamination and PIPETMAN® DIAMOND Sterilized Tips, which are gamma irradiated (SAL of 10⁻⁶) and certified free of DNA, RNA, RNases, DNases, ATP proteases and trace metals.

WIDE RANGE OF TIP PACKAGING

BLISTER REFILL

Individually wrapped racks of tips that are convenient, clean, and eco-friendly Ready to use, just peel the lid and insert into the empty box Uses 45% less plastic than regular rack box. Fully autoclavable. Available as sterilized and filter tips.

< refill system	
ich and 70%	
s the reload box	

TIPACK

New design is more compact, convenient, ergonomic and eco-friendly Patented ROCKY RACK system and hinged 180° angled lid makes it extremely easy to fit tips on multichannel pipettes Fully autoclavable

Available as sterilized and filter tips

Quickest way to reload empty box Uses 70% less plastic, recyclable packaging is eco-friendly

Easy to store, takes up less bench space Affordable and convenient Fully autoclavable

RELOAD PACK

EASYPACK AND ECOPACK

Purchase in bulk and save money by simply reloading these tips into empty racks Bags are sealed with rapid-sealing strip for easy access and to prevent contamination Minimal wast Fully autoclavable EASYPACK: 5 bags x 200 tips ECOPACK: 10 bags x 1000 tips

STERILPACK

Individually wrapped sterilized tips Complete protection from contaminants up to the moment of use Wrapped in medical device quality plastic terilization guaranteed for 5 years 400 individually wrapped sterilized tips

ERGONOMIC PIPETTING FOR NON-AQUEOUS LIQUIDS

MICROMAN® E positive-displacement pipettes, along with capillary pistons, offer the highest precision when ergonomically pipetting nonaqueous samples such as viscous or volatile liquids. Working like a syringe, capillary pistons eliminate the air cushion between the sample and disposable piston. Therefore, the accuracy of the pipette is not affected by the physical properties of the sample.

RELIABLE RESULTS EVEN WITH NON-AQUEOUS LIQUIDS

MICROMAN E positive-displacement pipettes, along with disposable capillary piston tips (CP) provide the highest precision when pipetting viscous or volatile liquids such as oils, blood, glycerol, and more.

Switch

OVERALL PROTECTION

Minimize the potential for pipette, sample, and human contamination. MICROMAN E provides safety by reducing aerosol formation and cross contamination when pipetting aggressive fluids like acids, alkalis, solvents, or hazardous samples such as infectious solutions or radiolabeled components.

DESIGNED WITH COMFORT IN MIND

The Red Dot award-winning design of the MICROMAN E features an improved handle shape that rests comfortably in your hand.

repetman®

THE MOTORIZED REPETITIVE DISPENSING SOLUTION

The REPETMAN[®] electronic, positive-displacement pipette provides fast and convenient repetitive transfers. The REPETMAN features three operational modes that cover transfer volumes from 1 μ L to 50 mL. It is well suited for routine applications in the clinical, biological, food and beverage, chemistry, environmental, and other fields.

COMFORTABLE PIPETTING WITH NO FORCE REQUIRED

It fits naturally in either hand and increases operator comfort.

IMPROVES RESULTS REDUCING OPERATOR ERROR

Motorized pipette with automatic recognition of the associated REPET-TIPS. REPETMAN is a positive-displacement pipette with a large choice of REPET-TIPS consumables - standard or sterile from 0.1 mL to 50 mL, covering a wide range of dispensed volumes: from 1 μ L to 50 mL.

distriman®

FASTER MULTIPLE DISPENSING

DISTRIMAN[®] is a positive-displacement, continuously adjustable, repetitive pipette with direct read out designed to simplify multiple dispensing when used with DISTRITIPS syringes. With DISTRIMAN, you can dispense the exact volume required for any protocol, even fractional volumes. It is ideal for repetitive dispensing in clinical, hospital, biological, chemical, food and beverage, pharmaceutical, cosmetics, and forensics labs.

SIMPLIFIES MULTIPLE DISPENSING

Dispense exact volumes without tedious calculations.

Optimal pipetting results even with volatile or viscous liquids.

SAVE MONEY

DISTRIMAN covers a large volume range with only three DISTRITIPS syringes very economical and available in standard or sterilized form (boxes of 50).

DISTRIMAN is the only continuously adjustable mechanical repetitive pipette with direct volume readout available on the market.

macroman®

serological PIPETTES

THE EFFICIENT SOLUTION FOR PIPETTING UP TO **100 MILLILITERS AT ONCE**

MACROMAN[®] is a reliable pipette controller for glass and plastic pipettes from 1 to 100 mL.

OPTIMAL SPEED CONTROL

Aspirating and dispensing speed can be set using pressure sensitive triggers or by using the thumbwheel while pipetting. The speed is adjustable up to 25 mL in less than three seconds.

The screen continuously displays battery status and the aspiration and dispensing speed setting.

COMFORTABLE USE

Prevent hand fatigue with MACROMAN's ergonomic handle featuring wide triggers maximum comfort and stress-free pipettin

The Lithium-Ion battery enables a longer, vibration-free use with reduced charging t

Increase precision by choosing your flow rate mode from slow drops to rapid dispensing.

Description

Wall mount

OPTIMIZED PIPETTING CONTROL

Ideal for scientists who need to easily and quickly transfer liquid aliquots from one container to another with precision, the Gilson disposable plastic serological pipettes are perfect for use with MACROMAN[®] to help you in your daily cellculture, molecular biology, and microbiology applications.

RELIABLE

Gilson serological pipettes are made with USP Class VI polystyrene and are free of contaminants that can alter your experiment. They are gamma-sterilized, non-pyrogenic, and certified free of detectable RNase/DNase.

The polyester fiber plug, offering a high level of protection against over-pipetting and contamination by liquids and aerosols.

EASY VOLUME CONTROL

These serological pipettes offer precise volume control and have color-coded rings for easy size identification, dark ascending; and descending graduations so you can easily read the aspirated and dispensed volumes. They also have negative graduations for extra capacity.

FLEXIBLE

Available in models ranging from 1 to 50 mL, these serological pipettes are recommended for use with MACROMAN® but can also be used with any pipette controller. They enable precise and convenient dispensing of different kinds of liquids for a variety of tasks.

DISPENSE LIQUIDS SIMPLY AND ACCURATELY

DISPENSMAN[®] is a bottle-top dispenser for convenient, safe, and precise delivery of common laboratory solutions and solvents. Its innovative, three-position nozzle controls the dispensing of liquids, the removal of air in the system to avoid liquid loss, and includes an anti-drip safety feature that returns liquid to the bottle.

PRECISE

Dispense just the liquid needed every time with a quick, easy, and precise volume setting.

NO LOSS OF LIQUID

Prime your operation by purging the air in RECYCLE position keeping the liquid inside the bottle and avoiding any loss of liquid.

SAFE

Keep your bench and other devices safe with the anti-drip system and the return of liquid into the bottle after use.

FLEXIBLE

Numerous bottle adaptors.

Adaptable to every type of liquid with an easy calibration by the user.

Fully autoclavable at 121°C.

Convenient 3-position nozzle.

trackman®

GUIDING YOU TO SUCCESS!

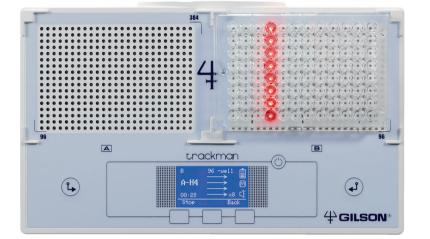

Get on track, keep on track, as you pipette flawlessly from one microplate to another with the help of TRACKMAN[®].

SECURE YOUR RESULTS

TRACKMAN simplifies your work, improves your productivity and helps eliminate pipetting errors and cross-contamination.

VERSATILE PERFORMANCE

The LED lights on TRACKMAN help you place your 96- and 384-well microplates in the correct position on the light panel, while fixed notches secure your plates firmly in place.

COMPLETE YOUR EQUIPMENT

Expand the functionality of your TRACKMAN with the versatile microtube-holder to transfer liquids from one microtube to another (0.5 mL, 1.5 mL, and 2 mL).

IMPROVED TEMPERATURE STABILITY KEEPS SAMPLES SAFE

With speeds of up to 13,500 rpm, the CENTRY[™] 117 Microcentrifuge has an easy-to-use touchscreen and offers one-button recall of up to nine stored custom run programs. Its proprietary air-flow system ensures temperature stability, even on extended runs, preserving sample integrity. The rotor design accommodates either 1.5–2.0 mL tubes or PCR strips.

INTUITIVE USE

The CENTRY 117 Microcentrifuge has a full-color, touchscreen control that displays speed (rpm or rcf), set time, and remaining run time. Easily program and store up to nine custom run programs, which are simply accessed through a single button. The CENTRY 117 Microcentrifuge achieves speeds from 1,000 to 13,500 rpm (100 to 16,800 x g), which can be set in 100 rpm increments. The built-in timer lets you set any time from 1 to 99 minutes.

IMPROVED TEMPERATURE ACCURACY

The CENTRY 117 Microcentrifuge offers improved temperature controls, guaranteeing that your samples remain at constant temperature, even during longer runs. The centrifuge can also be used in a cold room.

ADAPTABLE DESIGN

With its combination rotor design, the CENTRY 117 Microcentrifuge can accommodate up to 24 1.5–2.0-mL tubes or two PCR strips (16 x 0.2 mL) without needing separate adapters, making this ideal for many labs. In addition, its compact footprint takes up less of your precious benchtop.

NO MORE SPILLS WITH SPECIAL ROTOR DESIGN

The CENTRY[™] 101 Plate Centrifuge prevents microplate contents from spilling, increasing the reliability of your microplate reactions. The centrifuge accepts most popular PCR plates and microplates.

DECREASED SPILL RISK

The CENTRY 101 Plate Centrifuge offers a patented swing-out rotor design that keeps the microplate contents from spilling out while concentrating all reaction components in the well bottom, improving the accuracy of your reactions, such as sensitive PCR reactions. The rotor carriers rest at a 75° angle, allowing you to insert plates without sealing tape or caps. At speed, the microplates run vertically. The two-plate capacity CENTRY 101 Plate Centrifuge accommodates most PCR and microplates.

SMALL, BUT FAST

Samples are spun down in less than 20 seconds at 2,550 rpm (600 x g). The centrifuge automatically stops when the lid is open and smoothly decelerates to a stop in four seconds. With a small footprint (23 x 26 cm, 9.2 x 10.2 in.), the CENTRY 101 Plate Centrifuge easily fits into hoods and on crowded benchtops.

digital dry bath

digital hotplate

UNIFORM TEMPERATURE DELIVERY FOR A VARIETY OF TUBE SIZES

The compact Digital Dry Bath Series delivers precise temperatures to your samples using digital temperature and time controls. The aluminum blocks concisely fit tubes from 0.5 mL to 50 mL. Three models are available that accommodate one, two, or four blocks.

ACCURATE TEMPERATURE DELIVERY

The Dry Bath Series offers convenient digital temperature and time controls with built-in calibration functionality, improving the reliability and reproducibility of your reactions without external thermometers or timers. The Dry Bath Series provides a temperature range of +5°C to 150°C that is adjustable in 0.1°C increments. The timer can be set for up to 999 minutes.

UNIFORM TEMPERATURE ACROSS ALL SAMPLES

The Dry Bath Series accommodates a wide variety of high-grade aluminum blocks that are precisely engineered to the shape of 0.5, 1.5, 2.0, 15, and 50 mL tubes, providing uniform temperature delivery to all your samples and

improving reliability across reactions. Blocks are sold separately; custom blocks are available upon request. Each dry bath is supplied with an insulated block lifter to remove hot blocks.

PRECISE SPEED AND TEMPERATURE MIXING

Using advanced microprocessing technology, the Digital Hotplate Stirrer quickly delivers precise speed and temperature adjustments, up to 1,500 rpm and 380°C, respectively.

RELIABLE TEMPERATURE AND SPEED

The Digital Hotplate Stirrer relies on improved microprocessors to control temperature and speed, quickly and precisely. Temperature and speed are easily monitored on the large LCD display. A safety light indicates when the plate is above 50°C. The hotplate has a temperature range of 5°C-380°C and the magnetic stirrer speed ranges from 200 to 1,500 rpm.

For more stringent

applications, an optional temperature probe is available that transmits the actual sample temperature in real time to the microprocessor for continual adjustment within +/-0.5°C. An optional support rod for external thermometers or probes is also available.

VERSATILE SIZING

With a compact footprint 17.75 x 26.5 x 10 cm (7 x 10.5 x 4 in.), the Hotplate Stirrer fits easily onto the most crowded benchtop. The chemical-resistant, white ceramic top (16.5 cm/6.5 in. square) handles a range of popular glass flask and beaker sizes.

SELF-CONTAINED TEMPERATURE CONTROLS IMPROVE INCUBATION ACCURACY

With built-in digital temperature control, the Digital Mini Incubator allows you to accurately set the internal temperature without an external thermometer. Two models are available for heating only or heating and cooling, both with small footprints that accommodate large flasks.

ACCURATE

The Mini Incubator uses digital temperature controls to set and monitor the internal chamber temperature with improved accuracy over external thermometers and analog controls. The large LED panel displays the internal temperature for quick review.

VERSATILE

The Mini Incubator accommodates 2 L flasks in a small footprint that saves benchtop space. It includes two removable shelves and has a built-in internal universal outlet for connecting other instruments such as small shakers.

SMALL SIZE, POWERFUL MIXING

With touch-activated operation, the Mini Vortex Mixer provides powerful mixing in a small footprint for tubes up to 50 mL.

SMALL SIZE, POWERFUL MIXING

The Mini Vortex Mixer delivers a fixed speed of 2,800 rpm by only applying slight pressure to the center of the spill-resistant vortex head. Remove the pressure and the vortex motor immediately stops. The entire operation is quiet and smooth and contained in a small 10 x 10 cm (4 x 4 in.) footprint.

roto-mini PLUS

MAXIMIZE MIXING, MINIMIZE NOISE AND VIBRATION

With a unique balance system, our powerful Vortex Mixer offers instant vortex mixing without the noise and vibration. The mixer features both touch and continuous operation, variable speeds, and can be used in a range of temperature environments.

MAXIMIZE MIXING, MINIMIZE NOISE

The Vortex Mixer relies on a novel counter-balance system that provides powerful mixing action with decreased noise and vibration over other mixing instruments, even for 50 mL tubes. With its suction feet, the Vortex Mixer remains stable on your bench.

The Vortex Mixer offers instant variable speed control from 200 to 3,200 rpm and can be used in touch or continuous operating modes.

VERSATILE

The Vortex Mixer operates in a wide range of temperatures (+4°C to 65°C) and features spill-proof electronic controls. Several optional heads featuring both flat and multi-tube configurations are also available.

LIQUID HANDLING

FLEXIBLE VARIABLE SPEED ROTATOR FOR A RANGE OF APPLICATIONS

With speeds from 5 to 70 rpm, the Roto-Mini Plus variable speed rotator offers three operational mixing modes (Mix, Pause, and Rock) and accommodates standard tube sizes from 0.5 mL to 50 mL, making it a flexible addition to any lab.

FLEXIBLE OPERATIONAL MODES

With speeds from 5 to 70 rpm, the Roto-Mini Plus variable speed rotator provides three different mixing modes to cover many applications, including:

- Mix samples rotate with oscillations for increased mixing
- Pause sample rotation includes periodic pauses
- Rock samples gently rock in a see-saw manner.

ADAPT TO MANY TUBE STYLES

The Roto-Mini Plus includes four holders that cover the following common tube sizes:

- 11 x 1.5/2.0 mL tubes
- 5 x 5/7 mL tubes
- 5 x 10/15 mL tubes
- 6 x 50 mL tubes/24 x 0.5 mL tubes

PURIFICATION

Get the accuracy and precision you need for trusted results with VERITY® purification systems. Whether you isolate large or small molecules or need milligram to kilogram purifications, our VERITY systems offer you a wide array of components to build the perfect system to meet your specific needs. All systems are easily controlled by intuitive software, letting you focus on the science. Backed by Gilson's long history in chromatography, you are reassured that VERITY solutions are built to last and will make your life in the lab easier.

venity® COMPACT CPC SYSTEM

The VERITY[®] Compact CPC System combines a PLC Purification System with a centrifugal partition chromatography (CPC) column for high-level target compound purification. The technique of CPC and PLC supported on a single platform provides scientists the possibility to perform flash chromatography, preparative HPLC, or CPC separations on the same purification system configuration.

PURIFICATION SYSTEM SELECTION GUIDE

IDEAL FOR NATURAL PRODUCT PURIFICATION

Based on liquid-liquid purification technique, CPC does not denature fragile molecules. CPC columns tackle tough separations of complex samples in a single step without prior purification, making it an ideal choice for natural product isolation. It achieves 95% recoveries with greater than 99% purity.

EFFICIENT AND STREAMLINED WORKFLOW

The reusable, silica-free columns offer high injection capacities of milligrams to kilograms. Cost-effective and reusable CPC columns use approximately five times less solvent than more traditional columns and eliminates column replacement and silica recycling costs.

EASY TO USE

This fully automated system with dedicated Glider CPC Software offers flexible reporting capabilities and an intuitive touchscreen interface that enables easy method writing and modifying of parameters. The system and the software can be adapted to customer needs with the additional detectors or activation of the 21CFR compliance option.

PURIFICATION WITH MS

Save valuable time by confirming the molecular weight of the contents of every collected fraction during the purification process, which eliminates the need for subsequent analytical verification. The VERITY® 1910 MS Detector is a unique, chip-based mass detector that can be integrated into purification systems for HPLC, flash chromatography, or CPC.

PURIFICATION WITH MS SYSTEM SELECTION GUIDE

The VERITY[®] 281 LCMS System is a large capacity, high throughput preparative liquid chromatography (LC) system, that combines the separation power of HPLC with the detection power of a mass spectrometry (MS) detector. This reliable systems enables mass-directed purification.

HIGHLY MODULAR SYSTEM

VERITY 281 LCMS System offers modular components

for increased flexibility. The system configuration includes a GX-281 Liquid Handler for injection and fraction collection, Gilson pumping system, Gilson detectors with VERITY® 1910 MS Detector and powerful Gilson TRILUTION® LC Software.

OBTAIN RESULTS FASTER

By moving to mass spec detection using the VERITY 1910 MS Detector, reach your results faster thanks to more targeted fraction collection, quicker cleaning, and no need for subsequent analysis.

EASY TO MAINTAIN

The VERITY 1910 MS Detector has miniaturized, interchangeable components that are easier to maintain, lowering its operational costs when compared to traditional single quadrupole detectors. The compact, stackable design fits into most fume hoods and produces less heat and noise than conventional MS detectors.

PURIFICATION WITH MS

EXTRACTION

GET THE MOST FROM YOUR ANALYTICAL SYSTEMS WITH TRUSTED RESULTS

Solid phase extraction (SPE) is a highly selective cleanup technique that eliminates matrix effects and concentrates compounds present as traces to improve analytical detection. The ASPEC extraction line offers hands-free solutions that provides increased sample throughput and reliable test results while providing the traceability needed when studying metabolites, drugs, or proteins in biological, food, or environmental matrices.

AUTOMATED EXTRACTION SYSTEM SELECTION GUIDE

ASPEC* 241 SYSTEM	 Compact system for basic SPE automation Up to 36 samples on 1 mL cartridges, 20 on 3 mL and 16 on 6 mL
ASPEC* 271 SYSTEM	 Ultimate versatility system for basic and advanced SPE automation Up to 108 samples on 1 mL cartridges, 60 on 3 mL and 48 on 6 mL Optional dual syringe for accurate transfer down to 10 μL Optional injection for direct UPLC or LC integration Compatible with Gel Permeation Chromatography (GPC) and liquid-liquid extraction (LLE) cleanup applications
ASPEC [®] 274 SYSTEM	 High throughput system for basic and advanced SPE automation Process four samples in parallel Up to 108 samples on 1 mL cartridges, 60 on 3 mL and 48 on 6 mL Compatible with LLE cleanup
ASPEC* 271 LARGE VOLUME ASPEC* 274 SYSTEM SYSTEM	 Ultimate versatility system for basic and advanced small- to large-volume SPE automation Up to 16 large volume samples on 3 mL and 6 mL cartridges Segregated aqueous and organic waste Optional dual syringe for accurate transfer down to 10 μL Optional injection for direct UPLC or LC integration Compatible with GPC and LLE cleanup applications
ASPEC* 274 LARGE VOLUME SYSTEM	 High throughput system for small- to large-volume SPE automation Process four samples in parallel Up to 32 samples on 3 mL and 6 mL cartridges Segregated aqueous and organic waste Compatible with LLE cleanup

The ASPEC[®] 274 System for positive pressure solid phase extraction (SPE) maximizes throughput by processing up to four samples in parallel. With its small footprint and multiple probes, it is the ideal choice for high-throughput SPE automation on 1, 3, or 6 mL cartridges. Combined with ASPEC[®] SPE Cartridges, it generates reproducible and efficient sample cleanup for clinical, forensic, doping, food, and environmental testing labs.

PARALLEL PROCESSING FOR MAXIMUM EFFICIENCY

Four-probe Z-arm enables processing of four samples in parallel, increasing throughput and efficiency.

POSITIVE PRESSURE FOR REPRODUCIBLE EXTRACTIONS

Positive pressure extraction with unique sealing cap design increases reproducibility from sample to sample. The syringe pump delivers accurate volume dispensing.

SMART DESIGN FOR MAXIMIZED PERFORMANCE

Mobile rack technology enables multiple fraction elution and extraction per sample and additional sample transfer after SPE.

INTUITIVE ERROR HANDLING FOR TRUSTED RESULTS

The syringe pump pressure-sensing module provides error handling for high cartridge pressure or clogged liquid lines and monitors pressure on each fluid path individually. Innovative jet wash rinse stations minimize carryover and cross contamination.

VERSATILE SOFTWARE CONTROL FOR OPTIMIZED PRODUCTIVITY

TRILUTION® LH Software allows for multiple liquid handling applications such as liquidliquid extraction (LLE) and SPE on the same ASPEC system. Optimize throughput and efficiency by processing samples in either batch or sequential mode. Perform multiple elution and parallel solvent testing to quickly automate and optimize method development.

EXTRACTION

CONSISTENT PERFORMANCE, RELIABLE RESULTS

Get more reliable results with ASPEC® SPE Cartridges. These ready-to-use, highquality silica and polymer cartridges come in a variety of industry-standard phases and are available in 1, 3, and 6 mL cartridges, or 96-well plates. The ASPEC SPE Cartridges are available with ASPEC caps for cost-effective, automationready use on ASPEC automated solutions.

LOT-TO-LOT REPRODUCIBILITY

Reproducible extraction

TIGHT PARTICLE SIZE DISTRIBUTION

- Higher recoveries due to less risk of channeling
- Tighter peaks resulting in concentrated eluates

LARGE SURFACE AREA

- Large loading capacity
- Faster extractions with less sorbent mass, leading to less solvent volume

PRE-CAPPED CARTRIDGES AVAILABLE FOR ASPEC AUTOMATION

- Run cartridges right out of the box, saving valuable time with no need for manual capping
- Remove potential health concerns with repetitive manual operations
- Run samples faster
- Prevent run stopping due to improperly installed caps
- Custom phase pre-capped ASPEC cartridges available upon request
- Competitively priced versus uncapped cartridges with the need to purchase caps

RETENTION MECHANISMS SELECTION

Sample properties such as matrix type and compounds of interest solubility and polarity give a good starting point to identify the recommended sorbent and retention mechanism:

Analyte is soluble in			Analyte polarity	Recommended Phases (SILICA BASED - POLYMERIC)
			Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, ASPEC DVB*
		Aqueous	Non polar/Moderately polar	ASPEC C18 NEC, ASPEC C8, ASPEC C4, ASPEC CYANO, ASPEC HLB*
			Polar	ASPEC CYANO, ASPEC ACT. CARBON
		B	Cationic/Basic	ASPEC SCX, ASPEC SCX-2, ASPEC WCX
Aqueous		/Organic	Cationic/Basic (Neutral)	ASPEC X-SCX*, ASPEC X-WCX*
e e		Aqueous/Organic	Anionic/Acid	ASPEC SAX, ASPEC SAX-2, ASPEC WAX, ASPEC WAX-2
	,pe		Anionic/Acid (Neutral)	ASPEC X-SAX*, ASPEC X-WAX*
	Sample Matrix Type	Organic	Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, ASPEC DVB*, ASPEC HLB*
	Sal		Non polar	ASPEC C18, ASPEC C8, ASPEC C4, ASPEC PHENYL, ASPEC CYCLOHEXYL, ASPEC DVB*, ASPEC HLB*

extractman®

IMPROVE MANUAL SPE REPRODUCIBILITY

With uniform and consistent flow rate, the ASPEC® Positive Pressure Manifold improves solid phase extraction (SPE) reproducibility and recovery, even with high viscosity samples. It integrates easily into lab workflows, and provides a fast and simple way to prepare samples for subsequent analysis by chromatography. Compatible with both popular SPE cartridges and 96-well plates, you'll get flexibility and be able to perform parallel extractions to increase your throughput and productivity. Combine with Gilson repetitive pipettes for accurate volume dispensing.

COMPACT AND EASY TO SET UP FOR QUICK OPERATION

With its small footprint and only a single gas input, the ASPEC PPM is quick to set up and easily fits under fume hoods for extractions that use volatile solvents.

POSITIVE PRESSURE FOR REPRODUCIBLE EXTRACTIONS

With its integrated pressure gauge and intuitive controller, the manifold provides better flow control among samples and between runs than traditional vacuum manifolds, providing greater confidence in your data. Positive pressure ensures that all samples will elute regardless of the viscosity level.

FLEXIBILITY FOR A VARIETY OF APPLICATIONS

Compatible with both popular SPE cartridges and 96-well plates, the ASPEC PPM performs parallel extractions to increase throughput and productivity.

Request a quote today at <u>www.gilson.com</u> or from your local Gilson representative.

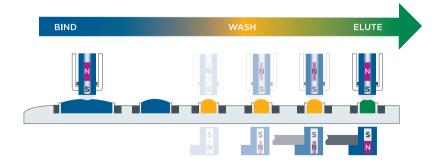

Co-immunoprecipitation (Co-IP) is a common technique for observing protein-protein interactions; however, weakly-or transiently-bound species often go undetected as aggressive or repeated wash steps in the Co-IP process can result in a loss of these interactions. EXTRACTMAN® allows for rapid, yet gentle washing of protein solutions during Co-IP thus isolating more transiently-bound, protein-protein interactions.

RAPID ISOLATION

Exclusion-based Sample Preparation (ESP[™]) technology enables high yield, high purity isolations without the need for long washing steps.

ERGONOMIC AND EASY-TO-USE

Slide-based extraction gently moves four samples in parallel through isolation with a simple slide of the handle.

GEL PERMEATION CHROMATOGRAPHY (GPC)

The VERITY[®] GPC Cleanup System is an ideal solution for post-extraction cleanup of high-molecular weight interfering substances from environmental samples, food products, and animal tissue prior to analysis using gel permeation chromatography (GPC). Removal of these contaminants leads to more reliable results, fewer sample repeats, and less downtime for downstream chromatography instruments.

GPC SYSTEM SELECTION GUIDE

AUTOMATED GPC CLEANUP FOR A VARIETY OF SUBSTANCES, MONITORED BY UV DETECTION

Improve column life and decrease downtime

Automated cleanup of up to 80 sample extracts

Modular system all under TRILUTION® LC Software control

Comply with GPC post-extraction guidelines set by the US Environmental Protection Agency (US EPA) and with other governments requirements

Pre-programmed GPC methods included

AUTOMATED GPC CLEANUP FOR A VARIETY OF SUBSTANCES

Improve column life and decrease downtime

Automated cleanup of up to 80 sample extracts

Modular system all under TRILUTION® LC Software control

Pre-programmed GPC methods included

VERITY[®] GPC CLEANUP SYSTEM

REMOVE ANALYTICAL INTERFERENCES WHILE IMPROVING METHOD EFFICIENCY AND REPRODUCIBILITY

The VERITY[®] GPC Cleanup System uses gel permeation chromatography (GPC) to remove contaminants from your sample matrices prior to analysis, producing more reliable results, fewer sample repeats, and less system downtime.

GPC CLEANUP FOR A VARIETY OF SUBSTANCES

The automated VERITY[®] GPC Cleanup System provides a post-extraction purification solution that removes matrix interferences prior to GC, GC/MS, HPLC, or LC/MS, extending the life of chromatography columns, protecting chromatography instruments, improving analytical accuracy, and lowering detection limits. The VERITY GPC System automates cleanup of up to 80 sample extracts and can collect multiple fractions from the same extract, all with reduced sample carryover. The system meets U.S., Canadian, and European Union requirements for GPC cleanup.

The VERITY® GPC Cleanup System is configured with a GX-271 Liquid Handler, GX Direct Injection Module, VERITY® 4020 Single Syringe Pump, VERITY® 3011 Isocratic Pump, TRILUTION® LC Software and an optional 157 UV-VIS Detector.

ALL UNDER TRILUTION® LC SOFTWARE CONTROL

The VERITY GPC System is controlled by the powerful TRILUTION LC software which contains preprogrammed methods for GPC post-extraction cleanup. The software error handling and shutdown methods help to minimize solvent waste and sample loss.

LIQUID HANDLERS

LIQUID HANDLER

Gilson liquid handling tools deliver the precise control you need for sample and reagent volume transfers, ensuring reproducible results, while making life in the lab easier. Beginning with the legendary PIPETMAN[®] technology, our liquid handling tools have evolved with your needs. We offer completely automated liquid handling

This small footprint, medium capacity liquid handler and autosampler offers smallto-large volume injection, fraction collection, and liquid handling capabilities. Its dynamic syringeless pumping system is capable of delivering microliters to hundreds of milliliters, with no change in hardware.

LIQUID HANDLER SELECTION GUIDE

INNOVATIVE INJECTION MODULES

This mid-throughput liquid handler can be configured with a GX Direct Injection Module for injection onto an HPLC or LC/MS system. An innovative injection port design that attaches directly to the injection valve reduces void volumes and minimizes carryover associated with calibrated connection tubing, allowing. injection volumes from $2 \,\mu\text{L}$ up to 25 mL. The continuous flow path design on all injection valves allows the system flow to continue even as the injection valve switches from load to inject, ensuring consistent pressure and flow.

VERSATILE, SPACE-SAVING DESIGN

With a small footprint of only 23 inches of linear bench space and with a mid-size bed capacity, you'll have the perfect blend of size, performance, and capacity. On-bed reservoirs provide access for up to four solvents without utilizing a position on the bed. The modular design supports the use of Code 20-, 200-, or 34X-series racks and easily accommodates a variety of tubes, vials, and microplates.

Request a quote today at www.gilson.com or from your local Gilson representative.

Gilson offers unsurpassed flexibility in HPLC pumping systems with an extensive product range and accommodations.

PUMP SELECTION GUIDE

VEBITY SOULSOCEATIC BLMD	VERLY JOILSOCKAIC FUMP	Vericy and Parson	IDEAL PUMPING SOLUTION FOR CHEMICAL REACTION MONITORING IN PETROLEUM APPLICATIONS AND GPC CLEANUP IN ENVIRONMENTAL APPLICATIONS High-pressure rating, up to 8,700 psi (600 bar), for accommodating industrial level applications Quick-connect pump heads for simple maintenance and reduced downtime Flow rates from 10 μL/min to 10 mL/min and integrated touchscreen controller for convenient, stand-alone operation
305 HPLC PUMP	306 HPLC PUMP		COST-EFFECTIVE, DEPENDABLE PUMPING SOLUTION Available in isocratic, binary and ternary configurations Interchangeable pump heads to accommodate flow rates from 10 μL/min to 200 mL/min
	522 HPLC PUMP		MULTI SOLVENT PUMP FOR ANALYTICAL TO SEMI-PREPARATIVE HPLC Accommodates flow rates from 0.15 mL/min up to 30 mL/min at pressures up to 8,700 psi (600 bar) High-pressure dynamic mixer Performs a binary gradient with a single unit
331/332 HBI C BIIMBS	551/352 AFLC FUMPS		THE PUMPING CHOICE FOR SEMI-PREPARATIVE HPLC Accommodate flow rates ranging from 0.5 mL/min to 50 mL/min at pressures up to 8,700 psi (600 bar) using columns up to 30 mm ID Multi-solvent selection with an optional four-solvent valve Features a variable-volume, dynamic mixer for optimized high pressure gradient performance
223/224 HDI C DIIMPC	55% 554 HFLC FOMPS		THE PUMPING CHOICE FOR PREPARATIVE HPLC Accommodate flow rates ranging from 1 mL/min to 200 mL/min at pressures up to 3,040 psi (210 bar) using columns up to 50 mm ID Multi-solvent selection with an optional four-solvent valve Features a variable-volume, dynamic mixer for optimized high pressure gradient performance
VERITY- 4 X20 SY RINGE PUMPS	4020 SINGLE 4120 DUAL WITH TEE 4220 DUAL		VERITY [*] SYRINGE PUMPS PROVIDE SPEED AND RELIABILITY Performs small- and large-volume, repetitive liquid transfers Available in single, dual, and dual syringe with tee configurations A pressure sensor is available in some models.

Verity[®] 4120 DUAL WITH TEE SYRINGE PUMP

The VERITY[®] 4120 Dual with Tee Syringe Pump is equipped with two syringes that are user-selectable. The capacity of the left syringe must be greater than or equal to the right syringe. The instrument includes one valve to direct liquid from reservoir or probe (on the left) and a tee connected via junction tubing (on the right).

The VERITY 4120 Syringe Pump assures accuracy in sample transfers, dilutions, reagent additions, mixing, and other liquid handling tasks. It offers speed and reliability for liquid handling tasks.

VERITY[®] 4120 DUAL WITH TEE SYRINGE PUMP

Technical Specification	Definition
Communication	USB
Dimensions (W x D x H)	22.6 x 17.1 x 26.9 cm (8.9 x 6.7 x 10.6 in.)
Precision	1%
Syringe Capacity	100 μL, 250 μL, 500 μL, 1 mL, 5 mL, 10 mL, or 25 mL
Software Control	PC control via USB and TRILUTION* LH or TRILUTION* LC Software
	Type: Three port, no moving parts
	Diameter of channels: 1.5 mm
Tee	Length of channels: 14 mm
	Angle between channels: 120°
	Liquid contact material: PEEK
	Dead volume: 51 µL

PUMPS

The compact MINIPULS[®] 3 Peristaltic Pump is a high-performance, low-pulse, peristaltic pump with interchangeable pump heads for delivering a diverse variety of liquids—from biological to chemical—without altering the critical components within the liquid. Six different channel and flow rate configurations are available.

PULSE-FREE LIQUID TRANSFER

Utilizing positive displacement pump technology, liquid flows nearly pulse-free as a result of ten stainless steel rollers. MINIPULS 3 produces smooth flows with excellent accuracy and precision, even at high flow rates.

FLOW RATES TO MEET YOUR NEEDS

With a choice of six quickly interchangeable pump heads, you'll have a wide range of flow rates to use for your applications.

Four standard models (1, 2, 4, or 8 channels): 0.3 $\mu L/min$ to 30 mL/min

Two high flow models (2 or 4 channels): 1 mL/min to 220 mL/min

EASY TO OPERATE

MINIPULS 3 is easy to install, simple to operate, and easy to maintain. With an uncomplicated keypad control and easy-to-read LCD screen, start/stop, flow direction, increase/decrease flow rate, and prime functions are easily accessible. Remote start/stop is also possible.

SELECT THE RIGHT TUBING

Most suitable material according to your sample's chemical compatibility.

Large variety of internal diameters to reach desired flow rates.

Appropriate connectors and extension tubing.

Request a quote today at www.gilson.com or from your local Gilson representative.

Verity® 1910 Ms detector

Gilson offers a complete line of HPLC detection solutions that are ideal for analytical, semi-preparative, and preparative HPLC applications.

DETECTOR SELECTION GUIDE

to	157 UV/VIS SINGLE WAVELENGTH DETECTOR Highly flexible and compact design Offers a single, but variable wavelength range of 190-750 nm Wide range of flow cells available from analytical and preparative HPLC to pilot-scale	
157 UV-VIS Detector 159 UV-VIS Detector		159 UV/VIS MULTIPLE WAVELENGTH DETECTOR Monitors up to four different wavelengths simultaneously while acquiring spectral data from 190–750 nm, allowing you to more easily track impurities Best-in-its-class value for noise, drift, and linearity achieved through smart optical bench technology and the use of optimized components Wide range of flow cells available from analytical and preparative HPLC to pilot-scale
171 Diode Array Detector 172 Diode Array Detector	and the second s	Delivers accurate UV/VIS and spectrum data with up to seven specific wavelengths simultaneously Flexible fiber optic light paths Interchangeable flow cell design
prepEL S [™] Detector		Expand detection capabilities for preparative or analytical HPLC applications Precise control of the spray chamber and drift tube temperature Revolutionary filtering capabilities allow for effective baseline noise reduction without affecting peak height or shape Easy to use and low maintenance
VERITY 1810 Conductivity and pH Monitor	Control of	State-of-the-art detection instrument for biological purifications Compact instrument with an integrated conductivity sensor and an external optional pH sensor Integrates into any Gilson VERITY® System
VERITY* 1910 MS Detector		Chip-based, single quadrupole mass spectrometry detector Provides a mass-directed purification solution Mass range detection capabilities from 50 to 1400 <i>m/z</i> Integrate with the PLC Purification System for HPLC, flash chromatography, or CPC or with the VERITY HPLC systems

The VERITY[®] 1910 MS Detector provides a complete, compact, and fully packaged solution for mass spectrometry (MS) purification. The VERITY 1910 MS Detector offers a mass range of 50–1400 m/z with the ability to collect full scan signals and up to four selected ion monitoring (SIM) channels simultaneously. The chip-based technology removes the routine maintenance and operation costs of a traditional MS detector and meets the high demands of purification applications. The MiDasTM module features a make-up pump and MRA splitter to deliver consistent flow to the VERITY 1910 MS Detector and allows for split ratios from 1:100 to 1:100,000 for purifying large amounts of compound, based on a target mass signal.

VERITY* 1910 MS DETECTOR		
Technical Specification	Definition	
Communication	Ethernet	
Detector	Electron multiplier detector	
Dynamic Range	Three orders of magnitude	
Flow Rate Range	0.3-2000 μL/min	
Interface	Off-axis vac-chip™ microengineered atmospheric pressure interface	
Ionization Modes	Positive and negative ESI modes	
Ion Source	Spraychip® electrospray ionization source	
Mass Analyzer	ionchip* quadrupole mass filter	
Mass Range	<i>m/z</i> 50-1400 with ionchip 150	
Pumping System	Integrated oil-free pumps	
Sample Inlet	Compatible with standard capillaries and unions e.g., 1/32" tubing	
Scan Modes	Full scan, SIM (4 <i>m/z</i> channels), simultaneous scan/SIM, and timed SIM	
Scan Rate	<i>m/z</i> 1,500/s (7,500 pts/s)	
Sensitivity	10 pg of reserpine yields a peak in SIM mode with a S/N ratio of 10:1 (RMS)	
Software Control	PC control via Ethernet and TRILUTION® LC Software Control via Ethernet and Gilson Glider Prep Software (GGP) and Masscape® Software Software	
Weight	32 kg (70.5 lbs.)	

Integrate with the PLC Purification System for HPLC, flash chromatography, or CPC or with the VERITY HPLC systems.

SOFTWARE

IDEAL SOLUTIONS FOR SMALL TO LARGE CAPACITY COLLECTION

Gilson offers advanced solutions for fraction collection with a complete line of stand-alone and software-controlled fraction collectors ranging from small footprint to large vessel capacity models. The built-in, easy-to-use keypad makes setup and operation simple and capable of interfacing with any HPLC system or control the system through your PC with TRILUTION® LC Software.

FRACTION COLLECTOR SELECTION GUIDE

The compact, lower capacity FC 203B Fraction Collector collects samples based on time, drop, or peak, making it the preferred choice for a range of LC applications. The collector accommodates a wide variety of collection vessels, including microplates, vials, and tubes and can be used with any HPLC system.

VERSATILE COLLECTION OPTIONS

Choose among peak, drop, or time collection options with the FC 203B. For example, in peak mode, the FC 203B monitors a detector signal and identifies peaks using either an adaptive-slope algorithm or a specified millivolt threshold. With up to ten programmable time windows to use, collect only what you want and discard the column void volume, peaks of no interest, and equilibration volumes. Multicolumn adapters are available for collecting up to 18 separate channels and an optional 3-way diverter valve prevents contamination of collected fractions.

The FC 204 Fraction Collector is a large-bed fraction collector capable of handling test tubes, vials, and up to eight shallow or deep well microplates. Fractions can be collected by drop, peak, or time, and the collector can be used with any HPLC system.

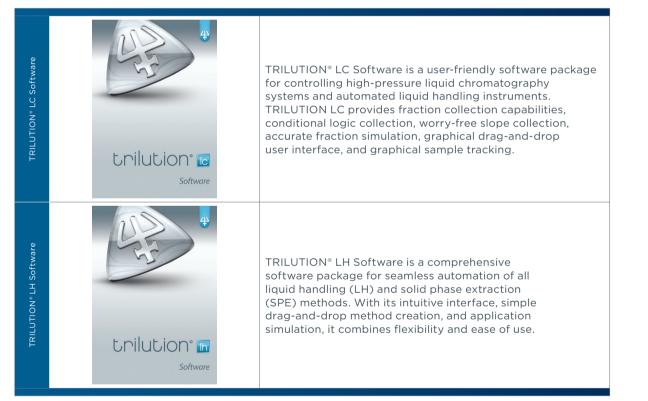

ADAPTABLE TO MANY COLLECTION STRATEGIES

Collect samples by peak, drop, or time. When collecting using drop counting, up to 9,999 drops may be collected per fraction with a maximum drop rate of 20 drops/second. The 3-way diverter valve prevents contamination of fractions. Multicolumn adapters allow for collection from up to 18 separate channels.

SOFTWARE DESIGNED BY SCIENTISTS FOR SCIENTISTS

Gilson offers powerful software to complement robust instruments. With accommodating features, drag-and-drop functionality, and numerous supplied tasks, Gilson software packages allow effortless, complete control of instruments, allowing you to focus on the science rather than the software.

SOFTWARE SELECTION GUIDE

ACCESSORIES

OPTIMIZE YOUR INSTRUMENTATION

Complementing robust and flexible instruments, Gilson accessories optimize instrumentation to fit application requirements for the ultimate solution.

ACCESSORIES SELECTION GUIDE

INCREASE THE FLEXIBILITY OF YOUR SYSTEM

Extends the capability of any chromatography or liquid handling system, by offering options for solvent selection, column switching and sample trapping Wide variety of valves, available in stainless steel or in biocompatible materials Fully controlled either via keypad or by TRILUTION[®] LC Software

The Orbital Shaker is specifically designed to satisfy liquid handling needs for on-line or off-line vortexing and mixing. It is a fully functional, stand-alone instrument. It is a compact shaker that fits on one rack position of a GX-281 Liquid Handler bed. The shaker provides a range of customer-controlled shaking (20 to 720 rpm) allowing vortexing on various vessel sizes and sample volumes.

COMPATIBLE WITH A WIDE RANGE OF RACKS

The Orbital Shaker is compatible with all Code 200-series racks. A single rack attaches easily using set screws; rack placement is accurately guided by locator pins.

Gilson offers standard and custom SPE racks to meet the needs of any and all applications. A variety of vessels can be accommodated including tubes, vials, or microplates.

racks

STANDARD AND CUSTOM RACKS

Gilson offers standard and custom racks to meet the needs of any and all applications. A variety of vessels can be accommodated including tubes, vials, microplates and microchips.

RACKCOUNT[™] SYSTEM

RackCount System overlays add numbering patterns to rack positions allowing you to quickly and easily locate specific samples or collected fractions on the bed of Gilson liquid handlers. The overlays are available in serpentine or non-serpentine numbering patterns.
